Front end Developer with experience in both independent and team projects. I specialize in building modern, user-friendly interfaces with React and TypeScript, applying advanced architectural approaches. I pay special attention to accessibility and code quality. Eager to contribute my skills to an ambitious team and build high-performance web applications together.

WORK EXPERIENCE

Web Developer (Freelance) Self-Employed

09/2021 - Present

Freelance Experience

Achievements/Tasks

- Development and maintenance of web projects for small businesses and private clients (WordPress, Elementor, PHP)
- Implementation of additional functionality: custom filters, dynamic galleries
- Page load optimization, technical SEO setup, implementation of structured data
- Managing projects from requirements gathering to launch and ongoing support
- Direct communication with clients: task analysis, proposing solutions, implementing improvements based on feedback

HTML5/JavaScript Developer Absolutist Ltd.
